

Murat Fatih Yanik

Full-Stack Web Developer

PROFESSIONAL SUMMARY

I am a proactive & ambitious Full-stack developer and seeking a role within the software development, technology development and machine learning, as I have strong skills with an excellent understanding of these areas. I have sound knowledge of project management, full-stack development, specifically front-end development. Hands-on experience working as the primary point of contact in software projects and in-depth knowledge of the Software Development Life-cycle.

Proven ability to develop solutions using front-end frameworks including CSS, Bootstrap, HTML, and many more.

My expertise lies in process improvement where I develop and analyse each phase of the project ensuring quality assurance and optimal results. I always want to work at a prestigious position and gain experience and knowledge to support business professionals with technology and creativity. I believe in teamwork and cooperation which always lead to success in this constantly changing world. I always try to accept challenging assignments. I want to explore innovative opportunities in information technology and management by utilising my effective communication, leadership, innovative, proactive, and creative problem-solving skills.
